CATALYTIC ACTIVITY: NADH + UBIQUINONE = NAD(+) + UBIQUINOL.

SUBUNIT: COMPOSED OF 14 DIFFERENT SUBUNITS. SUBUNITS NUOA, H, J,

K, L, M, N CONSTITUTE THE MEMBRANE SECTOR OF THE COMPLEX.

SUBCELLULAR LOCATION: INTEGRAL MEMBRANE PROTEIN.

SUBCELLULAR LOCATION: INTEGRAL MEMBRANE PROTEIN.

SUBCELLULAR LOCATION: INTEGRAL MEMBRANE PROTEIN.

SUBCELLULAR CONTROL OF THE NADH-UBIQUINOL OXIDOREDUCTASE
OF CHLOROPLASTS OR MITOCHONDRIA.

VIDEIRA A., TROPECHUG M., WERNER S.;

Primary structure, in vitro expression and import into mitochondria of a 29/21-kDa subunit of complex I from Neurospora crassa.";

Biochem. Biophys. Res. Commun. 166:280-285(1990).

1. FUNCTION: TRANSFER OF ELECTRONS FROM NADH TO THE RESPIRATORY CHAIN. THE IMMEDIATE ELECTRON STROM ADH TO THE ENZYME IS BELIEVED TO BE UBIQUINONE.

70 BE UBIQUINONE.

1. CATALYTIC ACTIVITY: NADH + UBIQUINONE = NAD(+) + UBIQUINOL.

1. SUBUNIT: COMPLEX I IS COMPOSED OF ABOUT 30 DIFFERENT SUBUNITS.

1. SUBCELLULAR LOCATION: MITOCHONDRIAL INNER MEMBRANE. IMPORTATION INTO MITOCHONDRION IS MEMBRANE POTENTIAL DEPENDENT.

IBIOCHEM. INTERPRETATE OXIDATIVE DEAMINATION OF D-ASPARTATE.

ICATALYTIC ACTIVITY: D-ASPARTATE + H(2)O + O(2) = OXALOACETATE + H(3) + H(2)O(2).

INTERPRETATION: DEAMINATIVE DINUCLEOTIDE.

ICOPACTOR: PAD OR 6-HYDROXYFLAVIN ADENINE DINUCLEOTIDE.

\*\*Characterization and expression of a genomic pectin methyl esteraseencoding gene in Aspergillus niger.";

Gene 106:71-77(1991).

1- FUNCTION: INVOLVED IN MACERATION AND SOFT-ROTTING OF PLANT TISSUE.

1- CATALYTIC ACTIVITY: PECTIN + N H(2)O = N METHANOL + PECTATE.

1- CATALYTIC ACTIVITY: BECOMES TO THE PECTINESTERASE FAMILY.

1- CAUTION: STRAIN RH 5344 WAS PREVIOUSLY SAID TO BE FROM A.NIGER.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   "Complete sequence and gene organization of the genome of a thermophilic archaebacterium, Pyrococcus horikoshii OT3."; DNA Res. 5:55-76(1998).

-i- CATALYTIC ACTIVITY: CARBAMOYL-PHOSPHATE + ASPARTATE = ORTHOPHOSPHATE + N-CARBAMOYLASPARTATE.

-i- PATHMAY: SECOND STEP IN PYRIMIDINE BIOSYNTHESIS.

-i- SUBUNIT: CONTAINS CATALYTIC AND REGULATORY CHAINS.

-i- SIMILARITY: BELONGS TO THE ATCASES/OTCASES FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         MEDLINE; 98344.3...
